Monoclonal Antibody to CD10
Purified Antibody (0.1 mg)

Clone: MEM-78
Isotype: Mouse IgG1
Specificity: The antibody MEM-78 reacts with CD10 antigen (CALLA - Common acute lymphatic leukemia antigen), a 100 kDa type II integral membrane protein.
HLDA IV; WS Code B 506
HLDA V; WS Code B CD10.4
Regulatory Status: RUO
Immunogen: NALM-6 human pre-B cell line
Species Reactivity: Human
Application: Flow Cytometry
Recommended dilution: 1 µg/ml
Immunoprecipitation
Purity: > 95% (by SDS-PAGE)
Purification: Purified by protein-A affinity chromatography
Concentration: 1 mg/ml
Storage Buffer: Phosphate buffered saline (PBS) with 15 mM sodium azide, approx. pH 7.4
Storage / Stability: Store at 2-8°C. Do not freeze. Do not use after expiration date stamped on vial label.
Expiration: See vial label
Lot Number: See vial label
Background: CD10 (neutral endopeptidase & NEP, common acute lymphocytic leukemia antigen & CALLA, membrane metallo-endopeptidase & MME, enkefalinase) is a 100-kDa cell surface zinc metalloprotease cleaving peptide bonds on the N-terminus of hydrophobic amino acids and inactivating multiple physiologically active peptids. CD10 is expressed on various normal cell types, including lymphoid precursor cells, germinal center B lymphocytes, and some epithelial cells, and its expression level serves as a marker for diagnostics of many carcinomas. CD10 is also a differentiation antigen for early B-lymphoid progenitors in the B-cell differentiation pathway and has a key role in regulation of growth, differentiation and signal transduction of many cellular systems.
