

Technical Data Sheet

Product

**Mouse IgM Isotype Control FITC**

Cat. Number/Size

**1F-803-C025**                      **0.025 mg**  
**1F-803-C100**                      **0.1 mg**

**For Research Use Only.**

**Not for use in diagnostic or therapeutic procedures.**

---

Clone	PFR-03
Format	FITC
Negative species	Rat, Pig, Mouse, Human
Application	FC (QC tested)
Application details	Negative control: The reagent is intended as an isotype control to establish the amount of non-specific antibody binding. For your particular experiment, use the same concentration of this control antibody as the recommended working concentration of the antigen-specific antibody. Also, when working with prediluted antibodies, dilute the isotype control to the same concentration as is the concentration of the antigen-specific antibody in the prediluted antibody solution you are using. If under particular experimental conditions the background signal of the isotype control is too high (usually when working concentrations of used antibodies are above 10 µg/ml of incubation mixture), change the conditions of your experiment to reduce the background.
Excitation laser	blue (488 nm)
Isotype	Mouse IgM
Specificity	This mouse IgM monoclonal antibody (clone PFR-03) reacts with undefined epitope on a plant pathogen.

---

Concentration	1 mg/ml
Preparation	The purified antibody is conjugated with fluorescein isothiocyanate (FITC) under optimum conditions. The conjugate is purified by size-exclusion chromatography.
Formulation	Tris buffered saline (TBS) solution with 15 mM sodium azide
Storage and handling	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light. Do not use after expiration date stamped on vial label.
