| Antigen               | TCR alpha/beta                                                                                                                                                                                                             |                  |
| Clone                 | IP26                                                                                                                                                                                                                       |                  |
| Format                | PE-Cy™5                                                                                                                                                                                                                    |                  |
| Reactivity            | Human                                                                                                                                                                                                                      |                  |
| Application           | FC (QC tested)                                                                                                                                                                                                             |                  |
| Application details   | Flow cytometry: The reagent is designed for analysis of human blood cells using 4 µl reagent / 100 µl of whole blood or 10 <sup>6</sup> cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests. |                  |
| Excitation laser      | blue (488 nm)                                                                                                                                                                                                              |                  |
| Isotype               | Mouse IgG1                                                                                                                                                                                                                 |                  |
| Specificity           | The mouse monoclonal antibody IP26 recognizes a monomorphic extracellular determinant of TCR alpha/beta, the dominant subtype of T cell receptor expressed in human peripheral blood.                                      |                  |
| Other names           | TCRA/B                                                                                                                                                                                                                     |                  |
| Preparation           | Purified antibody is conjugated with activated tandem dye of R-phycoerythrin-cyanine 5 (PE-Cy™5) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.    |                  |
| Formulation           | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                    |                  |
| Storage and handling  | Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.                                                                                                                                                   |                  |
