

Technical Data Sheet

Product **Anti-Hu TCR gamma/delta Purified**

Cat. Number/Size **11-147-C025** **0.025 mg**
11-147-C100 **0.1 mg**

For Research Use Only.

Not for use in diagnostic or therapeutic procedures.

Antigen	TCR gamma/delta
Clone	B1
Format	Purified
Reactivity	Human, Non-human primates
Application	FC (QC tested), IHC-F (reported)
Application details	Flow cytometry: Recommended dilution: 1-4 µg/ml. The reactivity of clone B1 (anti-TCR gamma/delta) may be affected by co-staining with an anti-human CD3 mAb, which is likely to block the epitope recognized by clone B1. When using antibody B1 in a panel that includes CD3, it is recommended to apply a staining protocol in which the B1 mAb is added to the sample and incubated for approximately 15 minutes before adding the remaining antibodies. No washing is required between the staining steps.
Isotype	Mouse IgG1 kappa
Specificity	The mouse monoclonal antibody B1 (also known as B1.1) recognizes an extracellular epitope of TCR gamma/delta, the subtype of T cell receptor expressed mainly in epithelial tissues and at the sites of infection.
Other names	TCRG/D

Concentration	1 mg/ml
Preparation	Purified by protein-A affinity chromatography.
Formulation	Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Storage and handling	Store at 2-8°C. Do not freeze.
